

Cold Bridge-breaker

Cold bridge-breaker is a strip of high-density polyethylene available in rolls. Protects steel building from heat losses throughout cold bridges.

Application:

Applied in between sheets and purlins, girts, C-profiles

Characteristics:

- usage temperature: -45/+95°C
- water absorption: <0,60
- air permability: very low

Product	Thickness [mm]	Width [mm]	Lenght [m]	R [m ² K/W]
Cold bridge breaker	10	50	20,30,50	0,20
