

Panel Plyta

Panel Plyta is a soft glass wool boards or rolls with a glass tissue facing on one side. Used in structures where not only insulation is needed but also wind tightness is recommended.

Application:

Thermal and acoustic insulation suitable in:

- timber and steel frame walls
- metal for example in steel buildings, but also for timber structures

Characteristics:

Max. usage temperature: 200°C

- insulation's elasticity enable gaps to be filled tightly
- doesn't require any special fixing accessories

Panel Plyta - technical specification

Product	Thickness [mm]	Width [mm]	Lenght [mm]	R _D [m ² K/W]	Quantity [m ² /pack]	Qty im MPS (rolls) [m ² /pallet]	Qty im MPS (boards) [m ² /pallet]
Panel Plyta	50	1200	600	1,35	14,40	-	288,0
